# DAY 1 | 24 OCTOBER | THE BIG ISSUES

9AM – 10AM AEDT

## Can GenAI live up to its promise...and what is it promising now?

Generative AI has dominated tech meetings, conversations, debates and demonstrations this year. We've been impressed, intimidated, inspired and disillusioned by the tech, so now almost a year since ChatGPT launched, is GenAI REALLY a gamechanger? Is it the ultimate catalyst and influencer? Can it/should it sustain its impact on the legal world through pivotal roles like legal ops?

In this session, legal ops legend [Mary O'Carroll](#), Chief Community Officer at Ironclad, Inc and Co-Founder of the Corporate Legal Operations Consortium (CLOC) will share her thoughts, experiences and use cases in response to those questions, as well as launch the Summit!

## Law Unlimited: Welcome to the re-envisioned legal profession

*Will Generative AI destroy law firms? Only if lawyers are too fixed in their ways to see the possibilities that lie beyond who we've always been and what we've always done.*

Join globally renowned legal commentator [Jordan Furlong](#), Principal at Law21, as he unpacks the challenges and opportunities of a GenAI fuelled and human centred legal world. One that is new, different and completely re-envisioned!

ChatGPT4 came after ChatGPT1 – getting from 1 to 4 and beyond took time, money, failure, frustration, resilience, agility, collaboration and multidisciplinary teamwork. These factors are all part of experimentation but they're not typically hallmarks of the legal industry. So, how do we get from here to the new digital legal world?

In this session, [Michelle Mahoney](#), Executive Director Innovation at King & Wood Mallesons will get into the nitty gritty of what experimentation means in legal and how GenAI is encouraging its integration into legal BAU in discussion with this incredible panel of legal experimenters:
